

CitiBike Analysis
Documentation of Calculations for Enhanced Data Analysis (Tableau)
Prepared by Malik Don @donanalytics

Field: Generational Cohorts

Purpose: Segment users by their birth year to classify them into generational groups.

Output: A categorization of users by generational cohort based on birth year.

Generational Cohorts

```
IF [Birth Year] <= 1945 THEN 'Silent Generation'
ELSEIF [Birth Year] <= 1964 THEN 'Baby Boomer'
ELSEIF [Birth Year] <= 1980 THEN 'Generation X'
ELSEIF [Birth Year] <= 1996 THEN 'Millennial'
ELSEIF [Birth Year] <= 2012 THEN 'Generation Z'
ELSE 'Generation Alpha'
END
```

Field: Gender Group

Purpose: Classify users by gender to analyze and compare data across gender categories.

Output: A grouping of users by gender.

Gender Group

```
CASE [Gender]
  WHEN 0 THEN 'Unkwown'
  WHEN 1 THEN 'Male'
  WHEN 2 THEN 'Female'
END|
```

Field: Trip Duration Bands

Purpose: Group users based on the duration of their trips into predefined time ranges.

Output: A categorization of trip durations into distinct bands for analysis.

Trip Duration Bands

```
IF [Tripduration] <= 30 THEN '0-30'
ELSEIF [Tripduration] <= 60 THEN '31-60'
ELSEIF [Tripduration] <= 120 THEN '61-120'
ELSE 'Above 120'
END

// "0-30" for trips up to 30 minutes
// "31-60" for trips from 31 to 60 minutes
// "61-120" for trips from 61 to 120 minutes
// "Above 120" for trips longer than 120 minutes
```
